

May 2009 - Person On Call LLC announces the deployment of Person On Call™ software at Lee Memorial Health System.

Lee Memorial is a large multi-hospital system in the Fort Myers, FL area. They operate four hospital Emergency Departments and have 27 affiliated physician practices which, along with staff personnel, serve their ER Call rosters. Due to their location in South Florida, they occasionally have the need to assemble large numbers of personnel in preparation for approaching weather.

Person On Call is proud to serve the Lee Memorial Health System in assuring these processes run smoothly and efficiently.

As Karen L. Mueller, Manager, Medical Staff Services, states:

"[Person on Call is a] great new scheduling tool . . . ED CALL had previously been so very time consuming. From the very beginning, the Person On Call staff was accommodating and the application extremely user friendly. No question was too small and they took their time to explain details so we understood how to take full advantage of every function available.

"After going live with Person on Call, the Emergency Medical Director's only comment was '*Person On Call worked perfectly*'.

"Person On Call functionality goes well past the Emergency Department and we have been encouraging other departments and the physician owned practices to take advantage of this tool for their scheduling needs.

"I cannot thank [Person On Call] enough and our staff and administrators are all happy with Person On Call. This was a definite win-win."

Person On Call greatly improves the production, distribution, and maintenance of your ER call and all hospital call lists. It effectively manages complex call lists, easily handles and instantly distributes unplanned changes, offers simple yet powerful archival and reporting tools, and accommodates ever-increasing regulatory requirements.
