

The Software Solution For Hospital Call Lists

March 2009 - Person On Call LLC announces the release of Version 4.1 of Person On Call™ software, with 21 major enhancements since the Version 4.0 release in July 2008.

Highlights of the Version 4.1 update include:

- Multi-Facility Access – Allows users to access additional facility call lists and enables outsiders to access your call lists if you wish.
- Data Import Utility – Allows existing data importation from virtually any other application. Reduces data entry.
- Delayed Publication – You choose when to “publish” call schedules, allowing their creation well in advance but made available only when desired.
- Calendar View – Added a new calendar view of individual and department/specialty call schedules.
- Scheduling Efficiencies – Various new tools to simplify call scheduling.
- Historical Call List Access – Rapid access to call list archives to support charting and reference needs.
- Other improvements in all four basic benefit areas of Person On Call: Operational, Regulatory/Compliance, Workload/Access Sharing, and Quality/Reporting.

Person On Call greatly improves the production, distribution, and maintenance of your ER call and all hospital call lists. It effectively manages complex call lists, easily handles and instantly distributes unplanned changes, offers simple yet powerful archival and reporting tools, and accommodates ever-increasing regulatory requirements.
